The State Highway System shall be designated by the Commission and shall be composed of intercounty and interstate highways.

~~(b)~~ B. When the Commission shall have taken over any highway, or part thereof, as a state highway, the Commission shall become responsible for the construction, repair and maintenance of such highway and for this purpose shall be authorized to use any state highway funds, together with any money derived from any agreement entered into between the Commission and the federal government, any county, or any citizen or group of citizens who have made donations for that purpose.

~~(c)~~ C. When from the date of this act any segment of the State Highway System is removed from such system, any bridge located on such removed segment shall remain the property of the State Highway Commission unless the board of county commissioners in which such segment is located shall within six (6) months designate such removed segment of highway as a part of the county highway system, regardless of the source of the funds with which said bridge was constructed. ~~(d)~~ D. The Commission shall provide and maintain a map of the state which shall show all the highways which have been designated as part of the State Highway System and, when practical, status of

improvement thereon. In addition, the Commission shall include on such map the principal access road to every city and town not served by the State Highway System and which has a United States Post Office or with a population in excess of one hundred (100) persons according to the latest Federal Decennial Census.
