SECTION 34. AMENDATORY 70 O.S. 1991, Section 18-201, as last amended by Section 5, Chapter 215, O.S.L. 1996 (70 O.S. Supp. 1997, Section 18-201), is amended to read as follows:

Section 18-201. A. Until the 1997-98 school year, the weighted average daily membership of a school district for calculation of Foundation Aid purposes pursuant to paragraph 1 of subsection B of Section 18-200 of this title shall be the sum of the weighted pupil grade level calculation, the weighted pupil category calculation and the weighted district calculation. The weighted average daily membership of a school district for calculation of Salary Incentive Aid purposes pursuant to paragraph 3 of subsection B of Section 18-200 of this title shall be the sum of the weighted pupil grade level calculation, the weighted pupil category calculation, the weighted district calculation, and the weighted teacher experience and degree calculation.

B. The weighted calculations provided for in subsection A of this section shall be determined as follows:

1. The weighted pupil grade level calculation shall be determined by taking the highest average daily membership of the preceding two (2) years of a school district and assigning weights to the pupils according to grade attended as follows:

GRADE LEVEL	WEIGHT
a. Early childhood programs	.5
b. Kindergarten	1.3
c. First and second grade	1.351
d. Third grade	1.051
e. Fourth through sixth grade	1.0
f. Seventh through twelfth grade	1.2

Multiply the membership of each grade by the weight assigned to such grade and add the totals together to determine the weighted pupil grade level calculation for a school district. Determination of the pupils eligible for the early childhood program weight shall be pursuant to the provisions of Section 1-114 of this title. No child for whom tuition is paid pursuant to the provisions of Section 1-114 of this title may be included in the average daily membership of the district providing the early childhood program.

2. The weighted pupil category calculation shall be determined by assigning a weight to the pupil category as follows:

CATEGORY	WEIGHT
a. Vision Impaired	3.8
b. Learning Disabilities	.4
c. Hearing Impaired <u>Deaf or Hard-of-Hearing</u>	2.9
d. Deaf and Blind	3.8
e. Educable Mentally Handicapped	1.3
f. Emotionally Disturbed	2.5
g. Gifted	.34
h. Multiple Handicapped	2.4
i. Physically Handicapped	1.2
j. Speech Impaired	.05
k. Trainable Mentally Handicapped	1.3

l.	Bilingual	.25	
m.	Special Education Summer Program	1.2	
n.	Economically Disadvantaged	.25	
o.	Optional Extended School Year Program		As determined by the State Board of Education

Except as otherwise provided, multiply the number of pupils approved in the preceding school year in each category by the weight assigned to such category and add the totals together to determine the weighted pupil category calculation for a school district. For the 1996-97 school year and subsequent school years the number to be multiplied by the weight assigned to the gifted category in subparagraph g of this paragraph shall be the lesser of (1) the sum of the number of students who scored in the top three percent (3%) on any national standardized test of intellectual ability plus the number of students identified as gifted pursuant to subparagraphs a through d of paragraph 1 of Section 1210.301 of this title or (2) the sum of the number of students who scored in the top three percent (3%) on any national standardized test of intellectual ability plus eight percent (8%) of the total average daily membership of the school district for the preceding school year.

3. The weighted district calculation shall be determined by determining the calculations for each school district for both the small school district formula and the district sparsity - isolation formula, applying whichever is the greater of the calculations of the two formulas and then applying the restrictions pursuant to subparagraph c of this paragraph.

a. Small school district formula: 529 minus total average daily membership divided by 529 times .2 times total average daily membership.

The small school district formula calculation shall apply only to school districts whose highest average daily membership of the preceding two (2) years is less than 529 pupils. School districts which are consolidated or annexed after August 19, 1991, pursuant to the Oklahoma School Consolidation and Annexation Act shall have the weighted district size calculation for the two (2) school years following the fiscal year in which such consolidation occurred calculated to be the sum of the individual consolidated districts computed as if the consolidation had not taken place. Thereafter, any such district which is consolidated pursuant to the Oklahoma School Consolidation and Annexation Act shall not qualify for the weighted district calculation unless the district can satisfy the specifications herein. Subject to the provisions of subparagraph c of this paragraph, the resulting number shall be counted as additional students for the purpose of calculating State Aid.

b. District sparsity - isolation formula:

The district sparsity - isolation formula calculation shall apply only to school districts:

- (1) whose total area in square miles is greater than the average number of square miles for all school districts in this state; and
- (2) whose areal density is less than one-fourth (1/4) of the state average areal density. Areal density shall be determined by dividing the

school district's average daily membership by the school district's total area in square miles. The district sparsity - isolation formula calculation shall be calculated as follows:

The school district student cost factor multiplied by the school district area factor. The resulting product shall be multiplied by the school district's average daily membership. Subject to the provisions of subparagraph c of this paragraph, the resulting number shall be counted as additional students for the purpose of calculating State Aid.

The school district student cost factor shall be calculated as follows:

The school district's average daily membership shall be categorized into the following grade level groups and applied to the appropriate formulas as computed below:

Grade Level Group

Grades K-5 Divide 74 by the sum of the Grade Level ADM plus 23, add .85 to the quotient, then multiply the sum by the Grade Level ADM.

Grades 6-8 Divide 122 by the sum of the Grade Level ADM plus 133, add .85 to the quotient, then multiply the sum by the Grade Level ADM.

Grades 9-12 Divide 292 by the sum of the Grade Level ADM plus 128, add .78 to the quotient, then multiply the sum by the Grade Level ADM.

The sum of the grade level group's average daily membership shall be divided by the school district's average daily membership. The number one (1.0) shall be subtracted from the resulting quotient.

The school district area cost factor shall be calculated as follows:

Subtract the state average district area from the district area, then divide the remainder by the state average district area;

however, the district area cost factor shall not exceed one (1.0).

The State Board of Education shall define geographical barriers whose location in a school district would inhibit the district from consolidation or annexation. The Board shall make available an application process, review applications, and for districts the Board deems necessary allow additional square miles to be used for the purposes of calculations used for the weighted district sparsity - isolation formula. Provided that the additional square miles allowed for geographical barriers shall not exceed thirty percent (30%) of the district's actual size.

c. State Aid funds which a district is calculated to receive as a result of the weighted district calculation shall be restricted as follows:

If after the weighted district calculation is applied, the district's projected per pupil revenue exceeds one hundred fifty percent (150%) of the projected state average per pupil revenue

then the district's State Aid shall be reduced by an amount that will restrict the district's projected per pupil revenue to one hundred fifty percent (150%) of the projected state average per pupil revenue. Provided, in applying the restriction provided in this division, the district's State Aid shall not be reduced by an amount greater than by the amount of State Aid which was generated by the weighted district calculation.

Projected per pupil revenue shall be determined by dividing the highest of the district's preceding two years average daily membership (ADM) as weighted by the pupil grade level, the pupil category, the district and the teacher experience degree index calculations for projected State Aid into the district's projected total revenues including projected funds for the current State Aid Formula, net assessed valuation for the preceding calendar year times thirty-nine (39) mills, county revenues of the second preceding year, other state appropriations for the preceding year and the collections for the second preceding year of state apportionment, motor vehicle revenue, gross production tax and R.E.A. tax. The district's projected total revenues shall exclude the following collections for the second preceding year: federal revenue, insurance loss payments, reimbursements, recovery of overpayments and refunds, unused reserves, prior expenditures recovered, prior year surpluses, and other local miscellaneous revenues.

4. The weighted teacher experience and degree calculation shall be determined in accordance with the teacher experience and degree index. The State Department of Education shall determine an index for each state teacher by using data supplied in the school district's teacher personnel reports of the preceding year and utilizing the index as follows:

EXPERIENCE	TEACHER EXPERIENCE - DEGREE INDEX		
	BACHELOR'S DEGREE	MASTER'S DEGREE	DOCTOR'S DEGREE
0 - 2	.7	.9	1.1
3 - 5	.8	1.0	1.2
6 - 8	.9	1.1	1.3
9 - 11	1.0	1.2	1.4
12 - 15	1.1	1.3	1.5
Over 15	1.2	1.4	1.6

The school district teacher index for each school district shall be determined by subtracting the weighted average state teacher from the weighted average district teacher. Multiply the school district teacher index if greater than zero by .7 and then multiply that product by the sum of the district's weighted pupil grade level calculation provided in paragraph 1 of this subsection and the weighted pupil category calculation provided in subparagraph n of paragraph 2 of this subsection to determine the weighted teacher experience and degree calculation.

SECTION 35. AMENDATORY Section 6, Chapter 215, O.S.L. 1996, as amended by Section 5, Chapter 343, O.S.L. 1997 (70 O.S. Supp. 1997, Section 18-201.1), is amended to read as follows:

Section 18-201.1 A. Beginning with the 1997-98 school year, and each school year thereafter, the weighted membership of a school district for calculation of Foundation Aid purposes pursuant to paragraph 1 of subsection D of Section 18-200.1 of this title shall be the sum of the weighted pupil grade level calculation, the weighted pupil category calculation, the weighted district calculation and the weighted teacher experience and degree calculation. The weighted membership of a school district for calculation of Salary Incentive Aid purposes pursuant to paragraph 3 of subsection D of Section 18-200.1 of this title shall be the sum of the weighted pupil grade level calculation, the weighted pupil category calculation, the weighted district calculation, and the weighted teacher experience and degree calculation.

B. The weighted calculations provided for in subsection A of this section shall be based on the highest weighted average daily membership of the first nine (9) weeks of the current school year, the preceding school year or the second preceding school year of a school district, unless otherwise specified. The highest of the three (3) weighted average daily memberships shall be used consistently in all of the calculations. The average daily membership data used for all calculations in paragraphs 1, 2, 3 and 4 of this subsection shall be the same as used in the calculation of the State Aid Formula. The weighted calculations provided for in subsection A of this section shall be determined as follows:

1. The weighted pupil grade level calculation shall be determined by taking the highest average daily membership and assigning weights to the pupils according to grade attended as follows:

	WEIGHT
a. GRADE LEVEL Early childhood programs, contingent upon the enactment of Enrolled House Bill No. 1657 of the 1st Session of the 46th Oklahoma Legislature	.7
b. Underage students enrolled in kindergarten for the 1997-98 school year, contingent upon the enactment of Enrolled House Bill No. 1657 of the 1st Session of the 46th Oklahoma Legislature	1.3
c. Underage students enrolled in kindergarten beginning with the 1998-99 school year, contingent upon the enactment of Enrolled House Bill No. 1657 of the 1st Session of the 46th Oklahoma Legislature	.7
d. Kindergarten	1.3
e. First and second grade	1.351
f. Third grade	1.051
g. Fourth through sixth grade	1.0
h. Seventh through twelfth grade	1.2
i. Out-of-home placement	1.45

Multiply the membership of each subparagraph of this paragraph by the weight assigned to such subparagraph of this paragraph and add the totals together to determine the weighted pupil grade level calculation for a school district. Determination of the pupils eligible for the early childhood program weight shall be pursuant to

the provisions of Section 1-114 of this title. No child for whom tuition is paid pursuant to the provisions of Section 1-114 of this title may be included in the membership count of the school district providing the early childhood program. The pupils eligible for the out-of-home placement pupil weight shall be students who are not residents of the school district in which they are receiving education pursuant to the provisions of subsection D of Section 1-113 of this title. Such weight may be claimed by the district providing educational services to such student for the days that student is enrolled in that district. If claimed, the out-of-home placement weight shall be in lieu of the pupil grade level and any pupil category weights for that student. Provided, if a student resides in a juvenile detention center that is restricted to less than twelve (12) beds, the out-of-home placement pupil weight for such students shall be calculated as follows: for a center with six (6) beds - 2.9; for a center with eight (8) beds - 2.2; and for a center with ten (10) beds - 1.74.

2. The weighted pupil category calculation shall be determined by assigning a weight to the pupil category as follows:

	CATEGORY	WEIGHT
a.	Vision Impaired	3.8
b.	Learning Disabilities	.4
c.	Hearing Impaired <u>Deaf or Hard-of-Hearing</u>	2.9
d.	Deaf and Blind	3.8
e.	Educable Mentally Handicapped	1.3
f.	Emotionally Disturbed	2.5
g.	Gifted	.34
h.	Multiple Handicapped	2.4
i.	Physically Handicapped	1.2
j.	Speech Impaired	.05
k.	Trainable Mentally Handicapped	1.3
l.	Bilingual	.25
m.	Special Education Summer Program	1.2
n.	Economically Disadvantaged	.25
o.	Optional Extended School Year Program	As determined by the State Board of Education

Except as otherwise provided, multiply the number of pupils approved in the school year with the highest average daily membership in each category by the weight assigned to such category and add the totals together to determine the weighted pupil category calculation for a school district. For the 1996-97 school year, the number to be multiplied by the weight assigned to the gifted category in subparagraph g of this paragraph shall be the lesser of (1) the sum of the number of students who scored in the top three percent (3%) on any national standardized test of intellectual ability plus the number of students identified as gifted pursuant to subparagraphs a through d of paragraph 1 of Section 1210.301 of this title or (2) the sum of the number of students who scored in the top three percent (3%) on any national standardized test of intellectual ability plus eight percent (8%) of the total average daily membership of the school district for the preceding school year. For the 1997-98 school year and subsequent school years, the number to be multiplied by the weight assigned to the gifted category in subparagraph g of this paragraph shall be the lesser of (1) the sum of the number of students who scored in the top three percent (3%)

on any national standardized test of intellectual ability plus the number of students identified as gifted pursuant to subparagraphs a through d of paragraph 1 of Section 1210.301 of this title, or (2) the sum of the number of students who scored in the top three percent (3%) on any national standardized test of intellectual ability plus eight percent (8%) of the total average daily membership of the school district for the first nine (9) weeks of the school year.

3. The weighted district calculation shall be determined by determining the calculations for each school district for both the small school district formula and the district sparsity - isolation formula, applying whichever is the greater of the calculations of the two formulas and then applying the restrictions pursuant to subparagraph c of this paragraph.

a. Small school district formula: 529 minus the average daily membership divided by 529 times .2 times total average daily membership.

The small school district formula calculation shall apply only to school districts whose highest average daily membership is less than 529 pupils. School districts which are consolidated or annexed after August 19, 1991, pursuant to the Oklahoma School Consolidation and Annexation Act shall have the weighted district size calculation for the two (2) school years following the fiscal year in which such consolidation occurred calculated to be the sum of the individual consolidated districts computed as if the consolidation had not taken place. Thereafter, any such district which is consolidated pursuant to the Oklahoma School Consolidation and Annexation Act shall not qualify for the weighted district calculation unless the district can satisfy the specifications herein. Subject to the provisions of subparagraph c of this paragraph, the resulting number shall be counted as additional students for the purpose of calculating State Aid.

b. District sparsity - isolation formula:

The district sparsity - isolation formula calculation shall apply only to school districts:

- (1) whose total area in square miles is greater than the average number of square miles for all school districts in this state; and
- (2) whose areal density is less than one-fourth (1/4) of the state average areal density. Areal density shall be determined by dividing the school district's average daily membership by the school district's total area in square miles.

The district sparsity - isolation formula calculation shall be calculated as follows:

The school district student cost factor multiplied by the school district area factor. The resulting product shall be multiplied by the school district's average daily membership. Subject to the provisions of subparagraph c of this paragraph, the resulting number shall be counted as additional students for the purpose of calculating State Aid.

The school district student cost factor shall be calculated as follows:

The school district's average daily membership shall be categorized into the following grade level groups and applied to the appropriate formulas as computed below:

Grade Level Group

Grades K-5

Divide 74 by the sum of the Grade Level ADM plus 23, add .85 to the quotient, then multiply the sum by the Grade Level ADM.

Grades 6-8

Divide 122 by the sum of the Grade Level ADM plus 133, add .85 to the quotient, then multiply the sum by the Grade Level ADM.

Grades 9-12

Divide 292 by the sum of the Grade Level ADM plus 128, add .78 to the quotient, then multiply the sum by the Grade Level ADM.

The sum of the grade level group's average daily membership shall be divided by the school district's average daily membership. The number one (1.0) shall be subtracted from the resulting quotient.

The school district area cost factor shall be calculated as follows:

Subtract the state average district area from the district area, then divide the remainder by the state average district area;

however, the district area cost factor shall not exceed one (1.0).

The State Board of Education shall define geographical barriers whose location in a school district would inhibit the district from consolidation or annexation. The Board shall make available an application process, review applications, and for districts the Board deems necessary allow additional square miles to be used for the purposes of calculations used for the weighted district sparsity - isolation formula. Provided, that the additional square miles allowed for geographical barriers shall not exceed thirty percent (30%) of the district's actual size.

c. State Aid funds which a district is calculated to receive as a result of the weighted district calculation shall be restricted as follows:

If, after the weighted district calculation is applied, the district's projected per pupil revenue exceeds one hundred fifty percent (150%) of the projected state average per pupil revenue, then the district's State Aid shall be reduced by an amount that will restrict the district's projected per pupil revenue to one hundred fifty percent (150%) of the projected state average per pupil revenue. Provided, in applying the restriction provided in this division, the district's State Aid shall not be reduced by an amount greater than by the amount of State Aid which was generated by the weighted district calculation.

The July calculation of the projected per pupil revenue shall be determined by dividing the highest of the district's preceding two years average daily membership (ADM) as weighted by the pupil grade level,

the pupil category, the district and the teacher experience degree index calculations for projected State Aid into the district's projected total revenues including projected funds for the State Aid Formula for the preceding year, net assessed valuation for the preceding calendar year times thirty-nine (39) mills, county revenues excluding the county four-mills revenues for the second preceding year, other state appropriations for the preceding year and the collections for the preceding year of state apportionment, motor vehicle revenue, gross production tax and R.E.A. tax.

The December calculation of the projected per pupil revenue shall be determined by dividing the highest of the district's first nine (9) weeks of the current school year or the two preceding school years average daily membership (ADM) as weighted by the pupil grade level, the pupil category, the district and the teacher experience degree index calculations for projected State Aid into the district's projected total revenues including funds for the December calculation of the current year State Aid Formula, net assessed valuation for the current calendar year times thirty-nine (39) mills, county revenues excluding the county four-mills revenue for the preceding year, other state appropriations for the preceding year and the collections for the preceding year of state apportionment, motor vehicle revenue, gross production tax and R.E.A. tax.

The district's projected total revenues for each calculation shall exclude the following collections for the second preceding year: federal revenue, insurance loss payments, reimbursements, recovery of overpayments and refunds, unused reserves, prior expenditures recovered, prior year surpluses, and other local miscellaneous revenues.

4. The weighted teacher experience and degree calculation shall be determined in accordance with the teacher experience and degree index. The State Department of Education shall determine an index for each state teacher by using data supplied in the school district's teacher personnel reports of the preceding year and utilizing the index as follows:

EXPERIENCE	TEACHER EXPERIENCE - DEGREE INDEX		
	BACHELOR'S DEGREE	MASTER'S DEGREE	DOCTOR'S DEGREE
0 - 2	.7	.9	1.1
3 - 5	.8	1.0	1.2
6 - 8	.9	1.1	1.3
9 - 11	1.0	1.2	1.4
12 - 15	1.1	1.3	1.5
Over 15	1.2	1.4	1.6

The school district teacher index for each school district shall be determined by subtracting the weighted average state teacher from the weighted average district teacher. Multiply the school district teacher index if greater than zero by .7 and then multiply that product by the sum of the district's weighted pupil grade level calculation provided in paragraph 1 of this subsection and the weighted pupil category calculation provided in subparagraph n of

paragraph 2 of this subsection to determine the weighted teacher experience and degree calculation.
