

**BILL SUMMARY**  
1st Session of the 54<sup>th</sup> Legislature

<b>Bill No.:</b>	<b>HB 2062</b>
<b>Version:</b>	<b>CCR A</b>
<b>Request Number:</b>	<b>8004</b>
<b>Author:</b>	<b>Rep. Derby</b>
<b>Date:</b>	<b>5/16/2013</b>
<b>Impact:</b>	<b>Clean-Up Legislation</b>

**For Information Services Division  
Of the Office of Management  
And Enterprise Services (OMES)**

**Research Analysis**

The CCS for HB 2062 adds information technology and telecommunication goods to county procurement procedures; authorizes the state's Chief Information Officer (CIO) to negotiate consolidation contracts, enterprise agreements and high technology systems contracts; requires the State Governmental Technology Applications Review Board (SGTARB) to establish a program to support and encourage state agencies to develop a telework model. The measure also:

- \*directs the CIO to develop an online site that will allow the public access to security breaches for which notification to the CIO is required;
- \* allows state agencies to request authority from the SGTARB to charge a convenience fee for electronic or online transactions;
- \*gives the SGTARB the authority to grant a temporary exemption to a state agency for the issuance of licenses or permits via an online process and to approve a plan by which elementary and secondary schools can recover the cost of instructional technology resources issued by the schools;
- \*authorizes the Information Services Division of the Office of Management Enterprise Services to request the processing of payments to the division against the funds of any delinquent agency to recover the cost of providing data processing and telecommunications services to that agency;
- \*requires the CIO to report annually the amount of savings realized from implementing the provisions of the Information Technology Consolidation and Coordination Act;
- \*requires state agencies, except institutions of higher education, that issue state publications to file the publication electronically; and
- \* provides that the CIO may allow an agency to utilize state information technology and telecommunications contracts in lieu of bidding procedures that might be applicable to such purchases.

The measure also repeals statutes related to the:

- Oklahoma State Government Payroll Processing One-stop Initiative;
- Requirement for state agencies to submit telecommunications and information technology plans;
- Duties of the Office of State Finance with regard to integrated central systems;
- Utilization of integrated central systems; and
- Information technology access clause.

**Fiscal Analysis**

The measure continues providing the necessary modifications to the statutes regarding information technology consolidation and modernization.

The Office of Management and Enterprise Services (OMES) has provided a synopsis of the main provisions of the bill:

1. Annual aggregate three percent (3.0%) reduction in operational IT and telecommunication expenditures by consolidated agencies (Section 25)
2. Aggregate shared services costs to be budgeted as a line-item through each agency (Section 22)
3. Resolution of non-payment by agencies for IT/telecommunication services provides by OMES Information Services Division (ISD) (Sections 12 and 13)
4. In facilitation of the Open Range Initiative, cost saving opportunities for political subdivisions through the use of state IT/telecommunications contracts (Sections 1-6, 30)
5. Repeal of superseded statutes resulting from IT/telecommunication consolidation (Section 38)
6. Governmental Technology Applications Review Board meeting process modified (Section 17)
7. Security breach transparency initiative for web access of security breach information (Section 10)

OMES indicates the primary intent of the measure is to continue in the efforts to consolidation IT/telecommunication systems and to realize efficiencies and potential in maximizing reductions in cost, where feasible.
