

BILL SUMMARY
2nd Session of the 54th Legislature

Bill No.:	HB3348
Version:	CS
Request Number:	9966
Author:	Armes
Date:	2/21/2014
Impact:	Pending

Research Analysis

The committee substitute for HB3348 would require anemometer used for measuring wind speed for use in wind power generation be marked, painted, and flagged for clear visibility if it is at least 50 feet tall. The measure specifies the specific markings required and the fine for violations.

Prepared By: Sean Webster

Fiscal Analysis

HB3348 has been reviewed and determined to have an impact, though it is unclear what entity shall receive payment of fees from persons who violate certain provisions. There is a fine not exceeding \$100.00 per day (not to exceed \$3,000.00) for each day a person is in violation of certain provisions.
