23 trees five (5) feet in height per acre.
24

1 B. For the purposes of the Oklahoma Resource Reclamation Act,
2 it is in the public interest that private occupied and unoccupied
3 lands within the state be managed to:

4 1. Discourage the proliferation of wildfires;

5 2. Reduce and control the infestation of Eastern Red Cedar
6 trees on lands;

7 3. Modify the growth of Eastern Red Cedar trees from areas
8 within one hundred (100) feet of homes or other structures, so as to
9 reduce the threat and severity of wildfires by creating a defensible
10 zone in accordance with the Firewise Program guidelines adopted by
11 the National Fire Protection Association;

12 4. Observe and protect all land-use rights of adjacent private
13 property landowners and public property to include methods and

24

1 C. It is in the public interest that local county and municipal
2 governments, including county assessors, shall, as funding is made
3 available, be allowed to engage the Oklahoma Tax Commission in a

20 damages and compensation in a court of law.

21 SECTION 11. NEW LAW A new section of law to be codified
22 in the Oklahoma Statutes as Section 5-2-104 of Title 27A, unless

24

1 Insurers duly licensed in the state writing property insurance
2 are hereby encouraged to provide incentives to policyholders who

6 known as the Eastern Red Cedar, around homes and other structures.

7 SECTION 12. NEW LAW A new section of law to be codified

9 there is created a duplication in numbering, reads as follows:

10 Sections 12 and 13 of this act shall be known and may be cited
11 as the "Oklahoma Woody Biomass Energy Initiative Act of 2016".

12 SECTION 13. NEW LAW A new section of law to be codified
13 in the Oklahoma Statutes as Section 5-3-102 of Title 27A, unless
14 there is created a duplication in numbering, reads as follows:

15 A. The Legislature makes the following findings:

16 1. That Oklahoma has an abundance of biomass which is defined
17 as organic material that is available on a renewable or recurring
18 basis including:

19 a. materials, precommercial thinnings or invasive species
20 from National Forest System land, Department of
21 Defense lands or public lands, as defined by law,
22 that:

23 (1) are byproducts of preventive treatments or are
24 removed to reduce hazardous fuels, to reduce or

1 contain disease or insect infestation or to
2 restore ecosystem health,

3 (2) would not otherwise be used for higher-value
4 products, and

5 (3) are harvested in accordance with applicable law
6 and a state or federally approved sustainable
7 forest management plan,

8 b. plant material from nonfederal land or land belonging
9 to a Native American or Native Tribe that is held in
10 trust by the United States or subject to a restriction
11 against alienation imposed by the United States,
12 including:

13 (1) feed grains,

14 (2) other agricultural commodities,

15 (3) other plants and trees harvested in accordance
16 with applicable law and a state or federally
17 approved sustainable forest management plan, and

18 (4) algae, and

19 c. residual material from nonfederal land or land
20 belonging to a Native American or Native Tribe that is
21 held in trust by the United States or subject to a
22 restriction against alienation imposed by the United
23 States, including:

24 (1) crop residue,

- 1 (2) other vegetative material including wood waste
- 2 and wood residues,
- 3 (3) animal waste and byproducts including fats, oils,
- 4 greases and manure,
- 5 (4) gas derived from the biodegradation of solid
- 6 waste, and
- 7 (5) the organic portion of municipal solid materials
- 8 including all cellulosic residuals segregated
- 9 from waste material, food waste, wastewater
- 10 treatment plants and yard waste;

11 2. That for purposes of the Oklahoma Woody Biomass Energy
12 Initiative Act of 2016, "woody biomass" means a material derived
13 from trees, shrubs, bushes, grasses including switch grass,
14 miscanthus or products made from woody plants;

15 3. That the *Juniperus Virginiana*, commonly known as the Eastern
16 Red Cedar tree, is a native tree which, due to conditions, is
17 encroaching upon ecosystems outside of its historic habitat at a
18 rate of seven hundred (700) acres per day in Oklahoma, contributing
19 to loss of water, grazing lands and wildlife habitat, fire loss and
20 allergic illness;

21 4. That the objectives of the provisions of the Eastern Red
22 Cedar Registry Act do not include the development of a specific
23 biomass energy use plan, but are specifically to assist state and
24

1 private landowners with gaining information regarding the control of
2 the Eastern Red Cedar tree and to provide educational support;

3 5. That woody biomass is a renewable energy source which can be
4 used to diversify the energy portfolio of the state when converted
5 to fuel known as biofuel and which can be pelleted or liquefied to
6 mix with natural gas and coal and burned in energy-efficient
7 boilers;

8 6. That based on a per million British Thermal Unit (BTU) by
9 fuel type, the rates for biofuel from woody biomass averaged in 2010
10 Two Dollars and fifty cents (\$2.50) for wood chips with forty
11 percent (40%) moisture as compared with electricity which averaged
12 Sixteen Dollars and fifty cents (\$16.50);

13 7. That in order for biofuel projects to be successful there
14 must be a sustainable supply of woody biomass and a well-developed
15 supply-chain formula making cover crops of switch grass or plants
16 such as miscanthus that can be harvested and pelletized an essential
17 part of the woody biomass statewide plan;

18 8. That harvested woody biomass can be produced for use as
19 chips, pellets and other forms which have energy values higher than
20 all traditional fuel sources, with Eastern Red Cedar having a
21 considerably higher BTU value;

22 9. That nearly every state in the United States now has some
23 type of public woody biomass project operating in either pilot
24 project or full-functioning form, with most focusing on the use of

1 woody biomass as an economical energy resource or as a means to
2 reduce energy costs for public facilities and state agencies which
3 now account for nearly two-thirds (2/3) of all energy produced;

4 10. That under Section 35-206 of Title 11 of the Oklahoma
5 Statutes the expenditure of funds for the purpose of conservation of
6 electricity or natural gas by public agencies is in the public
7 interest; and

8 11. That in Oklahoma woody biomass could be used to reduce
9 energy costs for public facilities such as the state correctional
10 facilities, and all other public facilities. The Department of
11 Corrections paid these high energy costs while at the same time
12 employees at the correctional facilities were forced to undergo
13 furloughs and staffing reductions. Further, the Department of
14 Corrections is authorized under Section 222 of Title 57 of the
15 Oklahoma Statutes to use prisoners on public-purpose projects
16 including harvesting Eastern Red Cedar trees.
