Research Analysis

HB 2541 provides that persons under the age of 18 who engage in the transmission of obscene material or child pornography or the parents of such person, can be required to attend and complete an educational program that addresses the possible legal and other consequences of sharing obscene materials or child pornography by means of electronic communication. The measure provides that it is an affirmative defense to the relayed transmission of obscene material or child pornography if a juvenile has not solicited the visual depiction and does not subsequently distribute or exchange the visual depiction. The measure requires each school board to establish a procedure for referral of a person who commits an act of bullying to a delinquency prevention and diversion program administered by the Office of Juvenile Affairs.
