**Fiscal Analysis**

HB 2766 has been reviewed and determined to have little fiscal impact on state revenues because this is designed to be a self-funding program, implemented through licensing fees. At this time, it is impossible to know how many animal crematory licenses will be purchased from the Department of Environmental Quality. Further, it is impossible to know how much the associated administrative fees will add to the agency's budget. That being said, the bill authorizes the Environmental Quality Board to adjust the initial fee to reflect the actual cost to the DEQ to implement the program, once that can be reasonably determined, so there should be no net fiscal impact on DEQ.

**Animal Crematory License: \$500.00**
