Research Analysis

SB 383 directs that should the people vote to amend the Oklahoma Constitution to remove restrictions on the control of low-point beer and wine, the Legislature is to enact laws providing for the strict regulation and control on the distribution, possession and transportation of all alcoholic beverages. The measure would authorized the sale of beer and wine in licensed retail stores and provides that goods, wares or other merchandise can be sold on the same premises on which retail alcoholic beverages are sold. The measure requires that the space in where retail alcoholic beverages are sold or displayed must be able to be secured by a door or closure during those times that retail sales of alcoholic beverages are prohibited. The measure would also allow a package store to sell beer that has been chilled to a temperature below room temperature.
