Research Analysis

HB3063, as introduced, established an annual cap equal to \$10 million for the zero-emission facilities production tax credit effective tax year 2019. The measure directs the Oklahoma Tax Commission to use a percentage adjustment formula to determine a percentage by which the credits authorized are to be reduced to satisfy the \$10 million annual cap. In the event that the total tax credits authorized exceed the annual cap, the commission will permit any excess, but must factor the excess into the percentage adjustment formula for subsequent years.
