Research Analysis

The floor amendment modifies the State Department of Education (SDE) school district expenditure database to include school site data beginning November 1, 2018. School districts with a website must provide a link from their website to the Oklahoma Cost Accounting System website page for the district before the beginning of the 2019-20 school year. The SDE must annually inform parents, schools and other stakeholders about the public database and how to use it.
