

BILL SUMMARY
1st Session of the 56th Legislature

Bill No.:	SB 326
Version:	Committee Substitute
Request Number:	7636
Author:	Representative Pfeiffer
Date:	4/25/2017
Impact:	\$0 to the State

Research Analysis

The committee substitute changes the name of the Roof Asset Management Program (RAMP) to the Oklahoma Optional Roofing Program, beginning January 1, 2018. The measure provides the following requirements for roofing repairs or replacements entered into by the Office of Management and Enterprise Services on behalf of a state agency: contracts \$50,000 or less are required to use the Optional Roofing Program; contracts totaling \$50,000 or more are given the option of the program or may follow the requirements of the Public Competitive Bidding Act of 1974. Finally, the CS places limits on the number of contractors under the program at no greater than six and no less than four in the same region of the state.

Prepared By: Kyle Meade

Fiscal Analysis

Provisions of the measure, which relate to the Oklahoma Optional Roofing Program at the Office of Management and Enterprise Services (OMES), include mandatory program use for projects valued at less than \$50,000, and permissive program use for projects exceeding \$50,000. OMES does not anticipate a significant change in the number of future projects or fee revenue associated with these provisions, thereby negating any additional agency or state revenue impact.
