Joanie,

This is in response to your request for a revenue impact for the proposed amendment to the Proposed Committee Substitute for SB 96 which would make the sales tax exemption afforded manufacturers inapplicable to wind electric power generation facilities constructed and placed in operation after December 31, 2018.

There is no estimated impact to state sales tax revenues for FY 18 and the estimated impact to state sales tax revenues for FY 19 is unknown.

Thank you.

Rick Miller, Director
Tax Policy and Research Division
