Fiscal Analysis

HB 1872, which authorizes the disciplinary committee to subtract credits in certain circumstances, could present a significant cost to DOC. Subtracting credits could prolong an inmate's sentence. The agency is unable to calculate an exact impact, however, the average daily cost per inmate in DOC custody for the state is \$58.70. The cost to DOC is dependent upon how many inmates have credits subtracted and the difference between release date with credits versus the release date without.
