**Research Analysis**

The CS to HB 3481 requires a pharmacy management consultant (PMC) to reimburse pharmacies at least the usual and customary price, the National Average Drug Acquisition Cost (NADAC), the wholesale acquisition cost, or the pharmacy's wholesale acquisition cost. Further, PMCs are prohibited from utilizing mail order pharmacies. The measure creates a fiduciary duty between the PMC and its clients, including retaining manufacturer rebates and amounts as a result of spread pricing. PMCs contracting with the Oklahoma Health Care Authority are directed to provide an annual financial report by November 1. The report must include:

- Amounts paid from drug manufacturers or wholesalers,
  - Drug manufacturer rebates,
  - Pharmacy claims payments,
  - Average cost reimbursement by drug to PMC-owned and non-PMC-owned pharmacies,
- and
- Pharmacy fees.

Lastly, the measure defines the term *pharmacy management consultant* as any pharmaceutical consultant or pharmacy benefit manager, and spread pricing as the practice of a PMC claiming an amount exceeding the amount paid to pharmacy to fill a prescription.
