Fiscal Analysis

Analysis provided by the Tax Commission:

The measure proposes amendment to Sections 1135.4 and 1135.7 of Title 47 by providing that personalized/specialty license plates shall be scheduled to be renewed on the same month as any regular license plate that may belong to the same vehicle.

A minimal decrease in motor vehicle collections is estimated due to issuance of credits in the first year to combine registration periods of personalized or specialty plates with the standard issue plate.

Additional administrative costs of \$58,000 related to programming and motor vehicle system modifications are anticipated.
