

BILL SUMMARY
1st Session of the 57th Legislature

Bill No.:	SB 184
Version:	CS
Request Number:	
Author:	Rep. Bush
Date:	4/3/2019
Impact:	Subject to availability of funds

Research Analysis

The CS to SB 184 clarifies that DNA collections must be collected by trained medical personnel, law enforcement, tribal law enforcement, judicial personnel and employees or contractors of these organizations. Individuals with DNA already on file are, under this measure, no longer exempt from additional testing. The measure also authorizes detention facilities to collect DNA if they possess Rapid DNA technology and if the collected sample is used for DNA matching or identification. Samples collected in a detention facility must be discarded after test is concluded. The measure authorizes the storage of DNA collected under a plea agreement.

Fiscal Analysis

The CS on SB 184 is subject to the availability funds. This permissive language does not require any entity to perform the duties of the bill and therefore has no direct fiscal impact.
