

BILL SUMMARY
1st Session of the 57th Legislature

Bill No.:	SB 690
Version:	CS
Request Number:	8803
Author:	Rep. Frix
Date:	4/17/2019
Impact:	\$0

Research Analysis

The CS to SB 690 increases the maximum allowable height of any vehicle on Oklahoma turnpikes, interstate highways, state and federal highways from 13.5 feet to 14 feet.

The measure requires The Department of Transportation to provide on its website an official state bridge vertical clearance map providing clearance heights as posted for bridges on the interstate, U.S. and state highway systems. The measure provides that operators and owners of vehicles which exceed or have loads which exceed 13.5 feet are to be held liable for all damages to any part of structures spanning the highway or damages suffered by other affected parties caused by the vehicle or load exceeding the posted height.

Prepared By: Brad Wolgamott

Fiscal Analysis

SB 690, which deals with increasing the allowable height for motor vehicles, has no fiscal or revenue considerations for the state.

Prepared By: Kristina King

Other Considerations

None.
