

Bill Summary
2nd Session of the 57th Legislature

Bill No.:	SB 1309
Version:	INT
Request No.:	3050
Author:	Sen. Montgomery
Date:	01/13/2020

Bill Analysis

SB 1309 prohibits state agencies from paying for hours worked on a computer and billed by the hour unless those hours are verifiable by data generated by automatic billing verification software if the project runs \$1 million over the estimated cost or runs more than 1 year behind schedule. Automatic billing software must meet certain requirements outlined in the measure and must be procured by a contract from an independent entity. The measure shall not apply to state employees, departments contracting with other departments, law enforcement agencies or certain contracts, or any individual who works for a contractor that performs work on a state-owned device.
