**Bill Analysis**

SB 378 requires an electronic report, in addition to the written report required by current law, to be sent to the Department of Public Safety detailing an incident or accident during the transportation, loading, unloading, or related storage in any place of a hazardous material. If an accident involving materials which are not subject to the Oklahoma Motor Carrier Safety and Hazardous Material Transportation Act but is subject to Title 46 or Title 49 of the Code of Federal Regulations occurs, the measure requires a copy of the report to also be sent to the Oklahoma Department of Transportation.
