12 issuing an initial prescription for acute pain pursuant to this  
13 section, the practitioner may issue one (1) subsequent prescription

18 b. the practitioner provides the subsequent prescription  
19 on the same day as the initial prescription,

20 c. the practitioner provides written instructions on the

15 sedatives, benzodiazepines or alcohol with opioids can result in  
16 fatal respiratory depression.

17 The practitioner shall include a note in the medical record of  
18 the patient that the patient or the parent or guardian of the  
19 patient, as applicable, has discussed with the practitioner the

15 with the patient-provider agreement, the practitioner shall assess  
16 the patient at a minimum of every six (6) months;

17 3. Periodically make reasonable efforts, unless clinically  
18 contraindicated, to either stop the use of the controlled substance,

18 this state by the Insurance Commissioner, and every contract

20 Management and Enterprise Services, on or after November 1, 2018,  
21 that provides coverage for prescription drugs subject to a

23 coinsurance or deductible for an initial prescription of an opioid  
24 drug prescribed pursuant to this section that is either:

1        1. Proportional between the cost sharing for a thirty-day  
2 supply and the amount of drugs the patient was prescribed; or

4 of the drug, provided that no additional cost sharing may be charged

19        K. Nothing in the Anti-Drug Diversion Act shall be construed to  
20 require a practitioner to limit or forcibly taper a patient on  
21 opioid therapy. The standard of care requires effective and  
22 individualized treatment for each patient as deemed appropriate by  
23 the prescribing practitioner without an administrative or codified  
24

1 limit on dose or quantity that is more restrictive than approved by  
2 the Food and Drug Administration (FDA).
