12 ~~An existing operation which does not have on file a list of the~~
13 ~~applicable licenses or permits with the Department on the date of~~
14 ~~enactment of this act shall not be out of compliance with the~~
15 ~~provisions of this section.~~ Any renewal of an existing permit or
16 expansion or amendment to an existing operation upon time of
17 application shall submit a copy of all approved licenses and permits
18 issued by other agencies or jurisdictions.

19 Identifications of all permits and licenses shall include local
20 government agencies with jurisdiction over or an interest in the
21 area of the proposed mining operation including, but not limited to,
22 planning agencies, water and sewer authorities; and all state and
23 federal government agencies with authority to issue permits and
24 licenses applicable to the proposed mining operation, including all

1 state environmental agencies, U.S. Army Corps of Engineers, U.S.
2 Department of Agriculture Natural Resources Conservation Service
3 district office, and federal fish and wildlife agencies.

4 J. An operator desiring to have such operator's permit amended
5 to cover additional land may file an amended application with the
6 Department. Upon receipt of the amended application, and such
7 additional bond as may be required under the provisions of the
8 Mining Lands Reclamation Act, the Department shall issue an
9 amendment to the original permit covering the additional land
10 described in the amended application, without the payment of any
11 additional fee.

12 K. An operator may withdraw any land covered by a permit,
13 deleting affected land therefrom, by notifying the Department, in
14 which case the penalty of the bond or security filed by such
15 operator pursuant to the provisions of the Mining Lands Reclamation
16 Act shall be reduced proportionately.

17 L. Permits issued to an operator may be transferable to another
18 operator if provided, the new operator can demonstrate to the
19 Department, prior to the transfer of ownership, that conditions and
20 obligations required for the permit will be met and the new operator
21 has submitted a performance bond or other guarantee, or has obtained
22 the bond coverage of the original permittee.

1 M. The perimeter of the permit area shall be clearly marked by
2 durable and recognizable markers or by other means approved by the
3 Department.

4 N. The Department shall determine the blasting distance to
5 transmission lines by rule.

6 O. 1. If any mining operations where blasting is required
7 occur within the limits of a municipality with a population in
8 excess of three hundred thousand (300,000) according to the latest
9 Federal Decennial Census or within the limits of a municipality
10 within a county with a population in excess of three hundred
11 thousand (300,000) according to the latest Federal Decennial Census,
12 the application for a permit pursuant to subsections C and D of this
13 section shall be accompanied by proof that the operator is in full
14 compliance with all applicable regulations of the municipality.
15 Certified copies of any required municipal permits and any other
16 required written municipal approvals shall be attached to the
17 application when submitted to the Department. No mining permit
18 shall be issued by the Department unless the applicant first
19 complies with the requirements of this subsection. A municipality
20 is not required to reconsider requests denied by the municipality
21 related to the same site unless the municipality determines there
22 has been a material change in the application.

23 2. The provisions of paragraph 1 of this subsection shall not
24 apply to existing permitted operations, revisions or amendments

1 thereto, or any application on file with the Department prior to May
2 25, 2005. In addition, the provisions of paragraph 1 of this
3 subsection shall not apply to any future operation on property
4 directly adjacent to property on which a permitted operation is
5 located, provided that the operation is permitted and the adjacent
6 property is owned or leased by the operator on the effective date of
7 this act. For purposes of this subsection, properties separated by
8 a public road shall be considered to be adjacent.

9 P. Within a reasonable time, as established by the Department,
10 written comments or objections on permit or bond release
11 applications may be submitted to the Department by public entities
12 including but not limited to the local soil conservation district,
13 with respect to the effects of the proposed mining operations on the
14 environment.

15 Q. Any person having an interest in or who is or may be
16 adversely affected by the decision on a permit or bond release
17 application, or any federal, state or local agency, shall have the
18 right to request in writing that the Department hold ~~an informal~~
19 ~~conference~~ a formal hearing on the application. The Department
20 shall hold the ~~informal conference~~ formal hearing within a
21 reasonable time following the receipt of the written request at a
22 location in the vicinity of the proposed or active surface mining or
23 reclamation operation.

24

SECTION 30. AMENDATORY 45 O.S. 2021, Section 725, is

amended to read as follows:

Section 725. A. All affected land other than lands affected by coal mining operations shall be reclaimed as provided in this section.

B. The operator shall determine which parts of the affected land shall be reclaimed for forest, pasture, crop, horticultural, homesite, recreational, industrial or other use including food, shelter and ground cover for wildlife.

C. All ridges and peaks of overburden created by surface mining shall be graded to a rolling topography traversable by machines or equipment customarily used in connection with the use to be made of the land after reclamation, but such slopes need not be reduced to less than the original grade of the area prior to mining, and the slope of the ridge of overburden resulting from a box cut need not be reduced to less than twenty-five degrees (25°) from horizontal. Surface mining operations conducted in the flood plains of streams and rivers and subject to periodic flooding shall be exempt from the grading requirements of this section.

D. The operator may construct earth dams to form lakes in pits resulting from surface mining operations, provided that the formation of lakes shall not interfere with other mining operations or damage property of others.

1 E. The operator shall cover the exposed face of a mineral seam,
2 where significant concentrations of acid-forming materials are
3 present, to a depth of not less than three (3) feet with earth that
4 will support plant life or with a permanent water impoundment.

5 F. The operator shall grade down the banks of any pits or
6 depressions created by the removal of sand or gravel by surface
7 mining to a degree of slope determined by the Department, which
8 shall give due consideration to the natural topography of the land
9 affected and adjacent lands, the composition of such banks and the
10 most beneficial use of the pits and depressions comprising the
11 affected land after reclamation. If the pits or depressions are
12 deeper than ten (10) feet, the operator may elect to bench the
13 highwall, provided that such benches are not in excess of ten (10)
14 feet in height.

15 G. All affected land except that which is to be covered with
16 water or used for homesites or industrial purposes shall be
17 revegetated by the planting of seeds, plants, trees, shrubs or other
18 plantings appropriate to the use to be made of the land as
19 determined by the operator. No planting of any kind shall be
20 required on any affected land so long as the chemical and physical
21 characteristics of the soil of such affected land are toxic,
22 deficient in plant nutrients or composed of sand, gravel, shale or
23 stone to such an extent as to seriously inhibit plant growth. The
24

1 Department may prescribe by rules and regulations the required
2 density of such plantings, and may make replanting requirements.

3 H. Except where prevented by weather conditions, all grading
4 shall be completed within one (1) year after mining of the affected
5 land has been completed. Initial seeding or planting shall be made
6 at the first appropriate time following completion of grading. If
7 the operator is unable to acquire sufficient planting stock of
8 desired species from state nurseries, or acquire such species
9 elsewhere at comparable prices the Department of Environmental
10 Quality shall grant the operator an extension of time until planting
11 stock is available to plant such land as originally planned.

12 I. In any noncoal mining operation where the type and amount of
13 material removed precludes the filling of the quarry, the Department
14 ~~of Mines~~ shall prescribe necessary measures for the protection of
15 the public and animal life.

16 SECTION 31. AMENDATORY 45 O.S. 2021, Section 727, is
17 amended to read as follows:

18 Section 727. The Department of Environmental Quality, or its
19 accredited representatives, may enter upon the lands of the operator
20 at all reasonable times, for the purpose of inspection, to determine
21 whether the provisions of this act have been complied with.

22 SECTION 32. AMENDATORY 45 O.S. 2021, Section 728, is
23 amended to read as follows:

1 Section 728. A. Any bond required to be filed with the
2 Department of Environmental Quality by the operator shall be in such
3 form as the Division Director prescribes, payable to the State of
4 Oklahoma, conditioned that the operator shall faithfully perform all
5 requirements of the Mining Lands Reclamation Act and comply with all
6 rules of the Department made in accordance with the provisions of
7 the Mining Lands Reclamation Act. Such bond shall be signed by the
8 operator as principal, and by a good and sufficient corporate
9 surety, licensed to do business in the state, as surety.

10 B. The penal sum of such bond shall be determined by the
11 Department and shall depend on the performance requirements of the
12 approved permit. The minimum bond shall be Two Thousand Dollars
13 (\$2,000.00).

14 In determining the amount of the bond, the Department shall take
15 into consideration the character and nature of the overburden, the
16 future suitable use of the land involved and the cost of reclamation
17 to be required.

18 C. A bond shall not be cancelable by the surety except after
19 not less than ninety (90) days' prior written notice to the
20 Department. Bonds may be continued in effect from year to year, and
21 a new bond need not be provided for each permit application. A
22 single bond may cover all of the operator's mining operations in the
23 state. The penalty of the bond or amount of cash and securities, as
24 provided in subsection E of this section, shall be increased or

1 reduced from time to time as provided in the Mining Lands
2 Reclamation Act.

3 D. If the license to do business in the state of any surety
4 upon a bond filed with the Department pursuant to the Mining Lands
5 Reclamation Act shall be suspended or revoked, the operator, within
6 thirty (30) days after receiving notice from the Department, shall
7 substitute for such surety a good and sufficient corporate surety
8 licensed to do business in the state. Upon failure of the operator
9 to make substitution of surety as required, the Department shall
10 have the right to suspend the permit of the operator to conduct
11 operations upon the land described in such permit until such
12 substitution has been made.

13 E. In lieu of such bond, the operator may deposit cash
14 government securities, Certificates of Deposit or an irrevocable
15 letter of credit with the Department in an amount equal to that of
16 the required bond on conditions as prescribed by the Department. In
17 the discretion of the Department surety bond requirements may also
18 be fulfilled by using existing reclaimed areas, in excess of
19 cumulative permit or mined acres, that have been completed under the
20 jurisdiction of the Mining Lands Reclamation Act and approved by the
21 Department.

22 F. Such bond or security shall remain in effect until the mined
23 acres have been reclaimed, approved and released by the Department.
24 If the Department determines that grading has been satisfactorily

1 completed pursuant to the Mining Lands Reclamation Act, the
2 Department may release up to eighty percent (80%) of the penal sum
3 of the bond filed for each acre of land graded. The remaining
4 portion of the bond shall continue in effect until the completion of
5 the requirements pursuant to Section 725 of this title.

6 SECTION 33. AMENDATORY 45 O.S. 2021, Section 729, is
7 amended to read as follows:

8 Section 729. The Department of ~~Mines~~ Environmental Quality
9 shall notify the operator and the surety in writing of any claimed
10 violation of the provisions of the Mining Lands Reclamation Act or
11 the rules of the Department. If the alleged violation is discovered
12 as a result of a citizen complaint and the person claiming the
13 violation states in writing the desire that the source of the
14 complaint be kept confidential, the Department shall maintain such
15 information in confidence. If the operator denies the alleged
16 violation, the Department shall hold a hearing on said charges.
17 Said hearing shall be held not less than thirty (30) days from the
18 notice of hearing.

19 At such hearing the operator shall have the right to present
20 evidence in opposition to the claimed violation.

21 If upon such hearing the Department shall determine that a
22 violation has occurred, the Department shall make detailed findings
23 of fact and conclusions of law. The surety, if applicable, may
24 perform for the operator.

1 If the operator or surety, if applicable, fails to perform the
2 corrective work required by the Department or fails to properly
3 perform said work, the Department may initiate permit revocation
4 and/or bond forfeiture proceedings. After successful collection of
5 the security required by Section 728 of this title, the Department
6 shall contract for the work to be done consistent with all state
7 requirements. The Department shall not issue any permits to an
8 operator who has failed to perform such corrective work, or has
9 defaulted with respect to the bond or other security required by
10 Section 728 of this title, until such obligations are met by the
11 operator or his surety or agent, as determined by the Department.

12 If the Department determines that an entity or individual has
13 mined without a permit in violation of Section 724 of this title,
14 the Department shall assess a fine of up to Ten Thousand Dollars
15 (\$10,000.00) against the entity, individuals, or agents of said
16 entity. Any agent is jointly and severally liable with its
17 principal for such violation and any resulting fines.

18 The Department may pursue civil action for relief, including a
19 permanent or temporary injunction, restraining order, or any other
20 appropriate order in the district court for the district in which
21 the illegal mining operation is located, in which the entity,
22 individuals, or agents of said entity, have their principal offices,
23 or in Oklahoma County, to enforce any Department action against the
24 entity, individual, or agents. Further, the Department shall be

1 entitled to recover penalties or fines assessed for mining without a
2 permit from the entity, individuals or agents conducting said mining
3 in violation of this title. The Department shall also be entitled
4 to reasonable attorneys fees incurred in enforcing this provision.
5 All monies collected pursuant to this section shall be deposited in
6 the Department of ~~Mines~~ Environmental Quality Revolving Fund.

7 In order to fully inform affected surface owners who have filed
8 a complaint of any alleged violations affecting the surface estate
9 by an operator, the Department shall:

10 1. Provide by mail to the affected surface owners who have
11 filed a complaint, a copy of any alleged violations affecting the
12 surface estate issued to the operator within five (5) days after
13 such violation is cited;

14 2. Notify the surface owners who have filed a complaint of any
15 hearings in connection to alleged violations affecting the surface
16 estate in the same manner and at the same time as the operator; and

17 3. Provide surface owners who have filed a complaint with
18 complete information on the disposition of all violations affecting
19 the surface estate cited at the same time the operator is notified.

20 SECTION 34. AMENDATORY 45 O.S. 2021, Section 731, is
21 amended to read as follows:

22 Section 731. The operator shall submit to the Department of
23 Environmental Quality, no later than September 1 following the end
24 of each permit year, a map in a form approved by the Department

1 showing the location of the pit or pits by section, township, range
2 and county, with such other description as will identify the land
3 which the operator has affected by mining during such permit year
4 and has completed mining operations thereon, with a legend upon such
5 map showing the number of acres of affected land. Such map shall
6 also show in acres the extent of the reclamation accomplished on the
7 affected land, including grading and revegetation efforts, as of the
8 end of the permit year, and shall show by appropriate designation
9 any deviation from the plan of reclamation filed under subsection
10 ~~(e)~~ E of Section 724 of this title and the reasons therefor.

11 Whenever an operator shall have completed all requirements under
12 the provisions of this act as to any affected land, he shall notify
13 the Department thereof. If the Department determines that the
14 operator has completed reclamation requirements and achieved results
15 appropriate to the use for which the area was reclaimed, the
16 Department shall release the operator from further obligations
17 regarding such affected land and the penalty of the bond shall be
18 reduced proportionately.

19 SECTION 35. AMENDATORY 45 O.S. 2021, Section 732, is
20 amended to read as follows:

21 Section 732. In addition to the duties and powers conferred on
22 the Department of Environmental Quality in other provisions of this
23 act, the Department shall have authority and power to:

24

1 ~~(a)~~ 1. Adopt and promulgate reasonable rules and regulations
2 respecting the administration of this act and in conformity

14 for technical advice or any other type of assistance deemed
15 necessary to carry out the purposes of this act.

16 SECTION 36. AMENDATORY 45 O.S. 2021, Section 733, is
17 amended to read as follows:

18 Section 733. At the request of the Department of Environmental
19 Quality, the Attorney General shall provide such legal assistance as
20 may be needed in interpreting, enforcing and carrying out the
21 provisions of this act including, but not limited to, institution of
22 and prosecuting legal actions and proceedings for injunctive relief
23 and this improvement shall include the provisions of Section ~~17~~
24 ~~hereof~~ 737 of this title.

6 an assistant designated by him or her.

7 SECTION 38. AMENDATORY 45 O.S. 2021, Section 735, is
8 amended to read as follows:

9 Section 735. The Department of Environmental Quality is
10 designated as the agency to make safety inspections in sand, sand
11 and gravel, and in quarrying operations. Any person required by
12 this act to have a permit who engages in mining without a valid
13 permit therefor issued pursuant to this act is guilty of a
14 misdemeanor, and on conviction thereof shall be fined not less than
15 Fifty Dollars (\$50.00) nor more than One Thousand Dollars
16 (\$1,000.00). Each day of operation without the permit required by
17 this act shall be deemed a separate violation.

24 amended to read as follows:

1 Section 742.1 This act shall be known and may be cited as the
2 "Coal Reclamation Act of 1979".

3 It is the intent of the Oklahoma Legislature that the Coal
4 Reclamation Act of 1978, ~~Sections 742~~ Section 742.1 et seq. of Title
5 45 of the Oklahoma Statutes, and this Coal Reclamation Act of 1979,
6 be read together as the law regulating the reclamation of lands
7 affected by surface coal mining operations and the surface effects
8 of underground coal mining, to bring Oklahoma into compliance with
9 Public Law 95-87, the "Surface Mining Control and Reclamation Act of
10 1977".

11 The provisions of the Mining Lands Reclamation Act, Sections 721
12 through 728 of Title 45 of the Oklahoma Statutes, shall not apply to
13 surface coal mining operations or the surface effects of underground
14 coal mining operations.

15 The Oklahoma Legislature finds and declares that coal mining
16 operations presently contribute significantly to the nation's energy
17 requirements, that Oklahoma's coal production is part of those
18 energy requirements, and that the cooperative effort established by
19 this act is necessary to prevent or mitigate adverse environmental
20 effects of all surface mining operations.

21 It is the purpose of this act to protect the rights of surface
22 owners and the environment, and to require reclamation of lands
23 affected by surface and underground coal mining in a manner
24 compatible with the social, environmental and aesthetic needs of

1 this state. If reclamation is not feasible, surface mining
2 operations should not be conducted. It is the intent of the
3 Legislature ~~to insure the existence of an expanding and economically~~
4 ~~healthy coal mining industry and~~ that there be public participation
5 in the development of rules and regulations appropriate to the State
6 of Oklahoma and that the Department of ~~Mines~~ Environmental Quality
7 exercise the full reach of its powers to insure the protection of
8 the public interest through the effective control of surface mining
9 operations.

10 configuration achieved by backfilling and grading of the mined areas
11 so that the reclaimed area, including any terracing or access roads,
12 closely resembles the general surface configuration of the land
13 prior to mining and blends into and complements the drainage pattern
14 of the surrounding terrain, with all highwalls, spoil piles and coal
15 refuse piles eliminated. Water impoundments may be permitted where
16 the regulatory authority determines that they are in compliance with
17 Section 745.18 of this title and applicable rules and regulations-;

18 6. "Aquifer" means a zone, stratum, or group of strata confined
19 or unconfined, including perched conditions, that can store and

7 determine the quality and quantity of overburden and coal of an area
8 and the gathering of environmental data to establish the conditions
9 of the area beginning before surface coal mining and reclamation
10 operations-i

11 10. "Coal processing plant" means a collection of facilities
12 where run-of-the-mine coal is prepared for market by chemical or
13 physical processing, and separated from its impurities. The
14 processing plant may consist of, but not be limited to, the
15 following support facilities: loading facilities; storage and
16 stockpile facilities; shed, shops and other buildings; water

5 primary responsibility for administering all titles of the Surface
6 Mining Law-;

7 13. "Division Director" means the ~~Chief Mine Inspector~~ Division
8 Director of the ~~State of Oklahoma~~ Division of Mines of the
9 Department of Environmental Quality or such officer, bureau or
10 commission as may lawfully succeed to the powers and duties of such

12 deputy or representative of the ~~Chief Mine Inspector~~ Division
13 Director as shall be designated by the ~~Chief Mine Inspector~~ Division
14 Director to perform any actions required by this act-;

15 14. "Disturbed area" means an area where vegetation, topsoil,
16 or overburden is removed by surface coal mining operations or upon
17 which topsoil, spoil, coal processing waste or noncoal waste is
18 placed. Those areas are "disturbed" until reclamation of those
19 areas is complete and the bond or other assurance of performance is
20 released-;

21 15. "Diversion" means a channel, embankment, or other manmade
22 structure constructed for the purpose of diverting the flow of water
23 from one area to another:
24

2 surface coal mining and reclamation are completed and
3 which has been approved for retention by the
4 Department and other appropriate state and federal
5 agencies,

22 twenty (20) degrees or the average slope of the profile of the
23 hollow from the toe of the fill to the top of the fill is greater
24 than ten (10) degrees. In fills with less than two hundred fifty

1 thousand (250,000) cubic yards of material, associated with contour
2 mining, the top surface of the fill will be at the elevation of the
3 coal seam. In all other head-of-hollow fills, the top surface of

4 months after the approval of Oklahoma's regulatory program by the
5 United States Secretary of the Interior shall make written
6 application to the Department for a permit within two (2) months
7 after the approval of the state program. Before the approval of the
8 Oklahoma program by the Secretary of the Interior, the requirements
9 of the Coal Reclamation Act of 1978 shall continue to apply to all
10 permits for coal mining covered by the Coal Reclamation Act of 1979.

11 Application for such permit shall be made upon a form furnished by
12 the Department, which form shall require all pertinent information
13 including, but not limited to, all information required by federal
14 law and regulations.

15 C. Any operator desiring to engage in underground mining shall
16 make written application to the Department for a permit within two
17 (2) months after approval of the state program. Application for
18 such permit shall be made upon a form furnished by the Department,

5 of this act under subsections B and C of this section, the Oklahoma
6 Water Resources Board, in coordination with the ~~Oklahoma~~ Department
7 of ~~Mines~~ Environmental Quality, shall promulgate rules for the
8 taking, using or disposal of water collecting in producing mine pits
9 and emanating from a sensitive sole source groundwater basin or
10 subbasin.

11 2. The rules promulgated by the Oklahoma Water Resources Board
12 shall require, subject to a de minimis exemption to be promulgated
13 therein, the development by the mine operator of provisions relating
14 to the augmentation (a beneficial use) of stream flow or
15 groundwater, and of site-specific water management and conservation
16 plans, which plans shall establish threshold hydrologic monitoring,
17 management and mitigation requirements that are based on relevant
18 hydrologic surveys and investigations of the sensitive sole source
19 groundwater basin or subbasin. Such plans submitted to the Oklahoma
20 Water Resources Board shall be subject to the provisions of the
21 Oklahoma Open Records Act.

22 3. The rules promulgated by the Oklahoma Water Resources Board
23 shall contain provisions relating to augmentation of stream flow or
24 groundwater, or both, to offset consumptive use of groundwater

1 collecting in the producing mine pit that emanates from a sensitive
2 sole source groundwater basin or subbasin in amounts greater than
3 the equal proportionate share of the maximum annual yield of the
4 groundwater basin or subbasin established by the Oklahoma Water
5 Resources Board that may be allocated to the owner or operator of
6 the producing mine based on groundwater rights owned or leased by
7 the owner or operator.

8 E. 1. By no later than January 1, 2013, the operator of a mine
9 that is exempted from this act by the provisions of subsection C of
10 this section shall adopt and implement a plan to monitor and report
11 to the Board the accumulation and disposition of pit water during
12 the previous calendar year. The operator shall also file with the
13 Board interim quarterly reports containing information about the
14 accumulation and disposition of pit water during the previous
15 quarter. The first interim quarterly report for calendar year 2013
16 shall be sent to the Board by June 30, 2013, and the annual report
17 for the calendar year 2013 shall be sent to the Board by March 31,
18 2014. Thereafter, the annual report for each calendar year shall be
19 sent to the Board by March 31st of the following year. The
20 monitoring plan will provide for the measurement or reasonable
21 estimation of groundwater and surface water volumes, separately
22 stated, entering the pit, of the water diverted from the pit, of the
23 disposition of the water from the pit, and of the consumptive use,
24 as defined in this section, of the mine pit water by the mine

1 operator. The reports received by the Board will be subject to the
2 provisions of the Oklahoma Open Records Act. If an operator of a
3 mine that is exempted from this act by the provisions of subsection
4 C of this section fails to timely submit an interim quarterly report
5 or annual report, the exemption of subsection C of this section
6 shall no longer apply to the mine and the rules promulgated pursuant
7 to subsection D of this section shall become applicable, provided
8 that such rules shall contain provisions to allow the operator to
9 show cause why the exemption contained in subsection C of this
10 section should continue to apply.

11 2. If, at any time after March 31, 2015, the amount of
12 groundwater from the pit (plus amounts of groundwater from permitted
13 wells, if any) consumptively used in the preceding twelve (12)
14 months by the mine operator at a mine described in paragraph 1 of
15 this subsection exceeds the annual amount that is equivalent to the
16 equal proportionate share of the maximum annual yield of the
17 groundwater basin or subbasin that could be allocated to the owner
18 or operator of the producing mine based on groundwater rights owned
19 or leased by the owner or operator, then the exemption of subsection
20 C of this section shall no longer apply and the provisions of
21 subsection D of this section shall become applicable to the mine
22 unless the mine operator submits a site-specific water management
23 and conservation plan demonstrating, to the satisfaction of the
24

1 Board, that such consumptive use of groundwater in amounts greater
2 than the equivalent equal proportionate share either is:

- 3 a. offset by augmentation of stream water flow or
4 augmentation of groundwater by recharge, or
- 5 b. not likely to reduce the natural flow of springs or
6 streams emanating from a sensitive sole source
7 groundwater basin or subbasin, or
- 8 c. satisfied by the owner or operator acquiring
9 sufficient groundwater rights within ninety (90) days
10 of the reported exceedance.

11 The plan submitted to the Board will be subject to the provisions of
12 the Oklahoma Open Records Act. If the exemption of subsection C of
13 this section no longer applies, the rules promulgated by the
14 Oklahoma Water Resources Board pursuant to subsection D of this
15 section shall provide a period of at least ninety (90) days to come
16 into compliance.

17 3. If an operator of a mine that is exempt pursuant to
18 subsection C of this section operates in compliance with a site-
19 specific water management and conservation plan that complies with
20 rules promulgated by the Board pursuant to subsection D of this
21 section, the Board cannot otherwise require the operator of such
22 mine to take an action or refrain from taking an action that would
23 effectively prohibit any mining operation or practice that is
24

1 otherwise allowed by the ~~Oklahoma~~ Department of ~~Mines~~ Environmental
2 Quality.

3 F. For purposes of this section, "consumptive use" or
4 "consumptively used" means diversion of water from a mine pit that
5 is not returned to the groundwater basin or subbasin, or to a mine
6 pit or holding basin, or to a definite stream, or to the land
7 surface from which surface runoff flows into a mine pit. The term
8 "consumptive use" includes the estimated moisture content driven off
9 or carried away with the mined material transported off the mining
10 site, plus the amount of evaporation from the mine pit that exceeds
11 the amount of direct precipitation and surface runoff into the mine
12 pit, plus any amounts for other proposed beneficial uses off the
13 mining site.

14 G. Augmentation of stream flow or groundwater, pursuant to a
15 site-specific water management and conservation plan prepared in
16 consultation with the Oklahoma Water Resources Board, shall be
17 considered a beneficial use and not waste, and shall not count
18 against permitted surface water or groundwater usage, provided that
19 taking, using or disposal of water from a producing mine for stream
20 augmentation pursuant to a site-specific water management and
21 conservation plan prepared in consultation with the Oklahoma Water
22 Resources Board, may be claimed in annual water use reports as a
23 beneficial use for purposes of the maintenance of the right to use
24 surface water under any permit applicable to such mine. The mine

1 pit shall be considered a diversion point authorized by the surface
2 water use permit issued to the mine operator whenever there is
3 consumptive use of surface water or the surface water is used for
4 stream augmentation.

5 SECTION 79. AMENDATORY 82 O.S. 2021, Section 1020.9C, is
6 amended to read as follows:

7 Section 1020.9C A. For the purposes of this section, a
8 "subject mine" shall mean a mine, as defined in paragraph 2 of
9 Section 723 of Title 45 of the Oklahoma Statutes, that overlies a
10 sensitive sole source groundwater basin or subbasin, exclusive of
11 any mine that meets at least one of the following conditions:

12 1. As of November 1, 2019, was engaged in the permitted
13 extraction of minerals from natural deposits; or

14 2. Satisfies the criteria of paragraph 1 or 2 of subsection C
15 of Section 1020.2 of ~~Title 82 of the Oklahoma Statutes~~ this title;
16 or

17 3. Is not to be permitted to operate for a period of more than
18 five (5) years, with no extensions or renewals; or

19 4. The operation of which will not result in more than five (5)
20 acre-feet per year of groundwater emanating from a sensitive sole
21 source groundwater basin or subbasin to infiltrate its pit, as that
22 term is defined in paragraph 12 of Section 723 of Title 45 of the
23 Oklahoma Statutes.

1 B. Due to the inadequacy of existing technical resources,
2 analytic tools and regulatory systems for purposes of the effective
3 implementation of statutes relating to the operation of mines that
4 may affect sensitive sole source groundwater basins or subbasins,
5 the Legislature hereby declares and establishes a moratorium on the
6 following actions:

7 1. The Oklahoma Water Resources Board shall not issue any
8 permit or other administrative authorization for the appropriation,
9 diversion, withdrawal or removal of water from or for the
10 dewatering, in part or in full, of a pit, as defined in paragraph 12
11 of Section 723 of Title 45 of the Oklahoma Statutes, of a subject
12 mine; and

13 2. The Board shall not issue, allocate or recognize, pursuant
14 to subsection D of Section 1020.2 of ~~Title 82 of the Oklahoma~~
15 ~~Statutes~~ this title, Section 785:30-15-5 of the Oklahoma
16 Administrative Code or any other provision of law, any offset to the
17 consumptive use of water of a subject mine where such offset is
18 based on a claimed augmentation of stream flow or groundwater.

19 C. The moratorium shall be in effect until such time as the
20 Board, working in coordination with the Department of Environmental
21 ~~Quality, the Department of Mines,~~ and East Central University and in
22 cooperation with federal and tribal governmental agencies with
23 interests in a subject mine that overlies a sensitive sole source
24 groundwater basin or subbasin:

1 1. Completes the Enhanced Monitoring and Evaluation of
2 Hydrologic Trends for the Eastern Arbuckle-Simpson Aquifer, South-
3 Central Oklahoma and, based thereon, develops modeling and other
4 technical tools capable of accurately measuring and projecting, as a
5 matter both of incremental and cumulative effect, whether a proposed
6 withdrawal of groundwater from a sensitive sole source groundwater
7 basin or subbasin would degrade or interfere with springs and
8 streams emanating therefrom;

9 2. Promulgates final rules to integrate the use of such studies
10 and tools to administrative implementation of:

11 a. waste, degradation and interference analyses required
12 by subparagraphs c and d of paragraph 1 and
13 subparagraphs c and d of paragraph 2 of subsection A
14 of Section 1020.9 of ~~Title 82 of the Oklahoma Statutes~~
15 this title,

16 b. uniform minimum standards and requirements for the
17 development of, and annual reporting regarding
18 compliance with, site-specific water management and
19 conservation plans pursuant to Section 1020.2 of ~~Title~~
20 ~~82 of the Oklahoma Statutes~~ this title, with
21 particular regard to methodologies for calculating
22 amounts claimed in consumptive use of water and any
23 claimed augmentation of stream flow or groundwater,
24 and

1 c. consultation, review and approval of such site-
2 specific water management and conservation plans, with
3 specific provisions for making such consultations,
4 reviews and approvals subject to Article 2 of the
5 Administrative Procedures Act; and

6 3. Promulgates final rules to provide for effective interagency
7 consultation and coordination of activities among the Board,~~the~~
8 ~~Department of Mines~~ and the Department of Environmental Quality on
9 all administrative matters relating to the operation of mines at
10 locations that overlies a sensitive sole source groundwater basin or
11 subbasin.

12 D. The Board is hereby authorized and instructed to promulgate
13 rules to implement the provisions of this section.

14 E. The Board is hereby authorized to cooperate with federal,
15 tribal and any other agency in this state in performing its
16 responsibilities under this section.
