Research Analysis

The floor amendment for HB 3439 amends the Oklahoma Industrial Hemp Program to add definitions for distinct parts of the plant and to modify the definition of "licensee" in order to provide a framework for remediation of industrial hemp that exceeds the allowed .3% concentration of THC but is less than 1%. The measure allows the licensee to remediate noncompliant hemp on site, or transport it to a remediation facility after informing the State Board of Agriculture. The measure also allows licensees to sell industrial hemp, excluding the flower, to livestock or pet feed manufacturers.
