

Bill Summary
1st Session of the 58th Legislature

Bill No.:	HB 2279
Version:	ENGR
Request No.:	
Author:	Sen. Kidd
Date:	04/05/2021

Bill Analysis

HB 2279 creates the Oklahoma Industrial Hemp Remediation Program and provides definitions for terms used in the act, including Hemp Program, which is defined as the Oklahoma Hemp Industrial Reform Program and any final ruling from the USDA. The measure allows a person licensed by the Oklahoma Department of Agriculture, Food, and Forestry whose hemp is deemed noncompliant with the Hemp Program to request approval from the Department to remediate the hemp. The licensee must promptly have the hemp extracted by a licensed processor into concentrated form and sampled by a certified laboratory for THC levels if approved. If the samples are below USDA levels for THC, the hemp is compliant and can be sold commercially. If the samples are noncompliant, the Department must be notified and the samples must be destroyed.
