Bill Analysis

HB 2293 excludes compensation paid to teachers if the sole source of such compensation was paid for in whole by federal funds or an externally sponsored agreement such as a grant, contract, or cooperative agreement and received by a teacher for teaching during a summer school program that is outside the scope of employment of the teacher as it relates to matching contributions from employer retirement contribution calculations. Additionally, the measure provides that a teacher shall not receive service credit for teaching during a summer school program as defined in the measure.
