Prior to implementation, the entity shall ensure that the new or amended requirement or restriction is reflected on the websites of the entity and the health benefit plan.

C. A utilization review entity making determinations on behalf of a health benefit plan shall make statistics regarding prior authorization approvals and denials available and readily accessible on its website to enrollees, health care providers, and the general public. Entities shall include the following information regarding approved or denied prior authorization requests:

1. Physician specialty;

2. Medication or diagnostic test or procedure;

9 utilization review entity shall be conducted by an independent

16 If a health care provider certifies in writing to a utilization
17 review entity within seventy-two (72) hours of an enrollee's
18 admission that the enrollee's condition required emergency health
19 care services, such certification shall establish a presumption that
20 the emergency health care services were medically necessary and such
21 presumption may be rebutted only if the utilization review entity
22 can establish, with clear and convincing evidence, that the
23 emergency health care services were not medically necessary.

1 5. If an enrollee of a health benefit plan receives an

2 health care provider received approval for the prior authorization.

3 B. A utilization review entity shall not deny or reduce payment
4 for a health care service exempted from a prior authorization
5 requirement pursuant to this act, including a health care service
6 performed or supervised by another health care provider when the
7 health care provider who ordered the service received the prior
8 authorization exemption, unless the rendering provider:

9 1. Knowingly or materially misrepresented the health care

5 approved prior authorization request shall be valid for one (1) year
6 from the date that the health care provider receives an approved
7 prior authorization determination. For prior authorization requests
8 approved regarding prescription drugs prescribed to an enrollee, the
9 approved request shall be effective regardless of any changes in
10 dosage.

11 B. If a utilization review entity approves a prior
12 authorization request for the treatment of a chronic or long-term
13 care condition, the prior authorization request shall remain
14 effective and valid for the duration of the treatment and the
15 utilization review entity shall not require the enrollee or provider
16 to obtain a subsequent prior authorization approval for the health

9 authorization request before the effective date of the change for
