Fiscal Analysis

HB 1836 modifies several statutes related to the Oklahoma Vehicle License and Registration Act, apportionment of motor vehicle collections, driver licenses and ID cards, Service Oklahoma, and licensed operators. The measure specifically allows Service Oklahoma to determine the amount of compensation retained by licensed operators and amends the fee and retention schedule for a variety of fees collected and services provided by licensed operators. This measure creates several different impacts, with an overall increase in amounts going to apportionment under the assumption that everything else is held constant. Below is a quick summary of the total fiscal impact of the changes within this measure.

Fiscal Impact:	\$6M increase to § 1104 apportionment
	\$23M decrease to State Public Safety Fund
	\$2.1M savings to State in licensed operator internet cost

Implementation Costs	\$650,000
----------------------	-----------

Concerning licensed operators, this measure would increase fee retention by the operators by \$15.8M, a 25.9% increase to the system. The measure no longer entitled licensed operators to retain amounts collected on penalties assessed against citizens. Currently, licensed operators retain roughly \$10M annually on penalties; this amount would instead be directed through the Title 47 O.S. § 1104 apportionment. This measure also no longer allows licensed operators to retain amounts of excise taxes paid for vehicle purchases. Currently, licensed operators retain roughly \$13M annually on excise tax payments; this amount would instead be directed through the § 1104 apportionment.

Concerning the 'State Public Safety Fund,' this measure makes changes to the fund's revenue sources. This fund currently receives revenues from vehicle registrations and driver licenses issuances, totaling roughly \$23M annually. The measure would instead direct those funds to the § 1104 apportionment; state agencies reliant on this fund, such as the Department of Public Safety, may need additional appropriations to cover this loss.

Concerning motor vehicle collections, this measure directs 1% of motor vehicle collections to a newly created 'Licensed Operator Performance Fund.' This would result in roughly \$8.75M

being deposited in this fund, which in turn would result in a reduction in the amount available for apportionment from this source.

Concerning State fund collections, this measure changes the retention amount of licensed operators for both driver licenses issues and fees collected specifically around motor vehicle registration. Currently, licensed operators retain \$3.56 per vehicle registered, which amounts to roughly \$13.4M retained annually from over \$211M in total registration fees collected. The measure instead has licensed operators retain 19% of their registration fees collected, for a new retained total of roughly \$40.2M. This would result in an offsetting reduction of roughly \$26.8M to State funds collections and the § 1104 apportionment.

Concerning driver license credential fees, licensed operators currently retain roughly \$5.8M annually. This measure would instead have licensed operators retain 40% of driver license and ID card credential fees paid by citizens; this change is estimated to have licensed operators retain roughly \$9.5M. This increase of \$3.7M in retention would be represented by an offsetting decrease in State fund collections and § 1104 apportionment.

Concerning credential costs of driver licenses for citizens 62 years of age and older, there is a current graduated reduced credential fee structure. This measure would eliminate this reduced credential fee structure and only provide a reduced fee for citizens 65 years or age and older. This is estimated to generate an additional \$800,000 in State fund collected and § 1104 apportionment.

Service Oklahoma estimates programming costs associated with the revenue and retention changes to total \$650,000. Licensed operators would also become responsible for technology and internet expenses, resulting in a savings of approximately \$2.1M to the State.
