Research Analysis

The committee substitute for HB 2249 modifies eligibility to play sports for students who transfer schools. The measure allows a transfer student to play sports on their first day of attendance at their new school if they did not letter in sports at their previous school. A student who transfers prior to their sophomore year may play sports on the first day of attendance at their new school. Otherwise, if a student transfers and does not qualify for a hardship waiver, they have to wait one year before they can play sports.
