**Fiscal Analysis**

SB 836 authorizes Service Oklahoma as the service provider relating to the issuance of licenses and allows the agency to authorize proprietary provider systems by Oklahoma financial institutions. This measure also allows the delivery of a certificate of title be made electronically. Per Service Oklahoma, this measure would require developmental and administrative changes for implementation, with an estimated administrative implementation cost of \$54,000 with a five to seven week timeline for development.

The CCR to SB 836 restores the title; therefore, there is no change in the fiscal impact analysis from the previous engrossed version of the measure.
