**Bill Analysis**

SB 1912 adds references to vertiports to the provisions of the Municipal Airports Act. It also authorizes the Oklahoma Department of Aerospace and Aeronautics to investigate the development of and create a statewide system plan that will provide the framework for the construction, development, siting, and potential partnerships required for vertiports and other infrastructure needed to integrate AAM and UAS into the existing air transportation system. The measure authorizes the Department to enter into partnerships with any political subdivision in the state to invest in and operate infrastructure needed to safely and effectively integrate AAM and UAS into the existing air transportation system.
