Research Analysis

HB3778 creates the Revised Uniform Fiduciary Access to Digital Assets Act and is a uniform law developed by the Uniform Law Commission. The act creates a framework to govern access to a person's online accounts when the account owner dies or loses the ability to manage the account. The act provides that an account owner may use an online tool to direct the custodian of the account to disclose some or all of the user's digital assets to a named fiduciary. If the person did not use an online tool to name a fiduciary, the owner can grant access to a fiduciary by will, trust, power of attorney or another instrument conveying access.
