**Bill Analysis**

SB 1264 requires each health benefit plan offered in the state to provide coverage for clinical genetic testing in accordance with NCCN clinical practice guidelines. Such testing shall determine an individual's family or individual history of cancer as well as utilize evidence-based cancer imaging for individuals with an increased risk of cancer. Such coverage shall not be subject to any annual deductibles, copayments, or coinsurance limits. If coverage would result in health savings account ineligibility, the provisions of this measure shall only apply to health savings accounts with qualified high deductible health plans.
