

Bill Summary
1st Session of the 59th Legislature

Bill No.:	SB 770
Version:	INT
Request No.:	1432
Author:	Sen. Hicks
Date:	01/25/2023

Bill Analysis

SB 770 provides that the Corporation Commission shall establish procedures for the form and manner in which petitions may be filed and notice and hearings may commence as it relates to further development of a common source of supply of wind and solar energy. If the Commission finds that such development shall increase the ultimate recovery of wind and solar energy from the common source or supply, reduce waste, will not exceed the value of the additional wind and solar energy so recovered, and is for the common good, the Commission shall make a finding ordering the creation of the unit. The order shall include the unit area and prescribe with reasonable detail the plan of unitization.
