Fiscal Analysis

The proposed subcommittee substitute to HB 3402 creates a revolving fund for the Oklahoma Department of Environmental Quality (DEQ) for all funds related to the testing of biosolids. As written, the creation of the revolving fund has no impact to state budgetary resources. However, DEQ has indicated that if the agency is required to test biosolids, they would require a one-time appropriation to the revolving fund of One Million Dollars (\$1,000,000.00) in order to purchase testing equipment as well as a recurring appropriation of Three Hundred Thousand Dollars (\$300,000.00) to maintain the equipment and compensate additional personnel in charge of the testing. The funding of this revolving fund will be subject to the Appropriations and Budget process.
