**Research Analysis**

The policy committee recommendation for HB 3673 requires all electrical licenses to expire each year on the licensee's birthday and allows renewal within 30 days before or after expiration. Licenses renewed more than 30 days late are subject to late fees and continuing education requirements.

Additionally, certain electrician licenses expired for more than one year may be renewed if the applicant submits a renewal form, pays the annual and accrued late fees, completes the required continuing education for the expired period and an extra six hours per year of expiration, and proves their good standing. These reinstatement rules apply to the unlimited journeyman license, residential journeyman license, unlimited contractor license, residential contractor license, and limited contractor license.

The measure also repeals the section of law regulating the current electrical license and registration terms.

**Fiscal Analysis**

The policy committee recommendation to HB 3673 establishes expiration and renewal guidelines for certain electrical licenses. Any fiscal impact as a result of this measure would be applicable to the Construction Industries Board, a non-appropriated state entity. Therefore, this measure has no direct fiscal or revenue considerations for the state.
