Research Analysis

HB 4413, as introduced, requires a municipal operator of a solid waste incinerator to develop a plan for continuously monitoring the air for certain contaminants. The plan must describe how the operator will conduct continuous monitoring for 12 months and make the data publicly available. It must be submitted to the DEQ within 3 months. Lastly, the measure limits a municipal incinerator from combusting more than 18,000 tons of hospital infectious waste per year.
