Research Analysis

The engrossed version of SB 640 increases the distance in which a medical marijuana dispensary and a commercial grower is prohibited from a school from 1,000 feet to 3,000 feet from the entrance of a school. This measure will not apply if a school is established 3,000 feet from a dispensary or commercial grower after the license has been issued. The measure also adds that if any place of worship is established within 3,000 feet of a dispensary or a grower after a license has been issued that the setback distance will not apply as long as the licensed property is used for its original licensed purpose.
