

Bill Summary
2nd Session of the 60th Legislature

Bill No.:	SB 1861
Version:	INT
Request No.	3370
Author:	Sen. Murdock
Date:	01/21/2026

Bill Analysis

SB 1861 directs the Corporation Commission and the Department of Transportation to identify a number of extra hazardous crossings that shall incorporate advanced detection and monitoring systems. Such systems shall detect and classify objects approaching the crossing, analyze object behavior in real-time, generate alerts, generate data to identify hazards, and provide integration capability. The measure directs the Commission to develop standards and specifications for the systems as well as provide technical assistance. The measure appropriates \$5 million from the General Revenue Fund to the Oklahoma Railroad Maintenance Revolving Fund.
