Bill Analysis

SB 2135 modifies purchasing procedures for counties by authorizing them to obtain and use a county purchase card issued through a county depository. Any purchase relating to countywide or multicounty contracts, utilities, intergovernmental payments, emergency acquisitions, and certain professional services shall be without limit. The measure limits all other purchases with the card to \$5,000.00 and requires all cardholders to sign a purchase card agreement prior to becoming a cardholder. Purchases using the card must continue to adhere to competitive bidding requirements.
